RANGES

The Range of Strength

Quaker Ranges are built for service—not for show. The castings are heavy and flawless, fitting together as though moulded in one piece.

There are no useless or complicated devices used only for advertising "talking points," but the simple and scientific construction steadily developed for more than half a century has nearly reached perfection in the new Quaker Models which we are proud to show you on our floor today.

NORWICH UNIVERSITY

Prof. McLeady of Massachusetts institute of technology has arrived and has taken up his duties as professor of drawing and descriptive geometry.

Foster C. Whitney, ex '15, of Franklin, was a recent visitor of friends in town.

Edward J. Collins has a leave of absence in, and is working in Barre, until the first of October.

Dorr E. Field, '11, who has been at work in the West since graduation, has gone to New Martinsville, W. Va., where he has employment as inspector on a big government dam. Several other Norwich men are there also.

E. C. White, '08, who was an instructor at junior summer school, has returned to his duties as professor at Cornell.

Charles B. Burch, '13, who has been at work in his home city all summer, has gone to Greenfield, Mass., where he is coaching the Greenfield high school football team. H. B. S. Burwell, also '13, is coaching the Concord, N. H., high school team after working during the summer for the Proctor Marble Co. at Proctor.
